The nature of the chiropractic manipulation: I will use either my hands an instrument or both to move the joints of your body; this may result in an audible “pop” or “click”.

The material risks inherent in an adjustment: As with any healthcare procedure, there are certain complications that may arise during a chiropractic manipulation. This may include: strains, dislocations, fractures, disc injuries and stroke. This list is not all inclusive.

The probability of those risks: Fractures are rare and can result from an underlying weakness in the bones. The other complications listed are considered rare. One source states that stroke is a possible occurrence in 1/1,000,000 cases or higher, even so we employ tests during our examination to identify if you may be susceptible to that kind of injury.

Ancillary treatments recommended: Ice, Moist Heat Packs, Cervical Traction and Fenzian Treatment System.

Risks involved with the recommended ancillary treatments: Ice and Moist Heat Packs can cause burning. Cervical Traction can cause temporary post-treatment soreness or reflex muscle spasms. This list is not all inclusive.

Other treatment options for your condition can include: Medical care with prescription drugs, self management with over-the-counter medication, rest, and/or surgery. There are material risks inherent in each of these options including but not limited to: addiction to medication, side effects of medication, improper self dosages and surgical risks including complications from either the procedure and the anesthesia.
